

Customized System Solutions

For more than 80 years STAHL has been on the forefront of safety technology for hazardous areas.

One of the key elements of our product range is providing customized, explosion-protected system solutions. The focus is on combination of several types of protection and different enclosures.

ELECTROMACH, member of the R.STAHL Technology Group, provides system solutions for worldwide application in many industries such as oil & gas, pharmaceutical, chemical industries alongside with shipbuilding/naval as well as onshore and offshore industries.

ELECTROMACH is your partner to rely on fully.

Everything From One Source For Your Efficiency

To meet specific application and customer requirements, ELECTROMACH assembles individual packages consisting of a combination of products and comprehensive services:

- Enormous saving potentials in the planning process thanks to efficient engineering
- Wide product range for optimum interaction of all components
- Special solutions for extreme temperatures
- Professional consultation in your region thanks to a worldwide distribution network

Of course, you will receive a detailed documentation for every system.
